**SUBJECT OF EXAMINATION:** The written test is designed to test for knowledge, skills, and/or abilities in such areas as:

1. **ARITHMETIC REASONING** - These questions test your ability to solve an arithmetic problem presented in sentence or short paragraph form. You must read the problem, understand the situation presented, decide what must be done to solve it, and apply the appropriate arithmetic operation(s) in the appropriate order, in order to determine the correct answer. Knowledge of addition, subtraction, multiplication, and division will be necessary. Questions may also involve the use of percents, decimals, and fractions.
2. **INSPECTION AND INTERVIEWING TECHNIQUES** - These questions test your ability to select the proper course of action in situations which might occur during routine inspections. Question topics may cover, but will not be limited to, such areas as interviewing, gathering information and evidence, maintaining proper attitude, and handling irregularities and violations with integrity and sound judgment. Some questions may be in a situational format while others may deal with the proper principles and practices of inspection.
3. **PREPARING WRITTEN MATERIAL** - These questions test for the ability to present information clearly and accurately, and to organize paragraphs logically and comprehensibly. For some questions, you will be given information in two or three sentences followed by four restatements of the information. You must then choose the best version. For other questions, you will be given paragraphs with their sentences out of order. You must then choose, from four suggestions, the best order for the sentences.
4. **DETERMINING THE ACCURACY OF SCALES** - These questions are designed to test a candidate's ability to determine if weighing scales are reading accurately and, if not, the extent of error associated with each scale. The candidate is shown a test load and given the weights of single units in the load and must calculate the total weight of the test load. The candidate is also shown two separate scale readings and must determine if either or both readings are fast or slow and by how much. Knowledge of addition, subtraction, multiplication and division will be necessary. Specific knowledge of weights and scales is not required.
5. **UNDERSTANDING AND INTERPRETING WRITTEN MATERIAL** - These questions test how well you comprehend written material. You will be provided with brief reading selections and will be asked questions about the selections. All the information required to answer the questions will be presented in the selections; you will not be required to have any special knowledge relating to the subject areas of the selections.
6. **WEIGHTS AND MEASURES** - These questions are designed to test a candidate's knowledge of the various types of weighing and measuring systems commonly used throughout business and industry. The subtest will deal with, but is not necessarily limited to, such areas as:
  - Typical quantities associated with the Metric and English weights and measures systems;
  - Types of linear and liquid measuring devices in common use;
